“The People’s College”

Becoming The Premier Rural Community College in America

Employee orientation successful

For the most part employees at Luna Community College said they felt that orientation was successful.

Last week’s faculty and staff orientation was far from traditional, but the message was just as effective—working together brings student success.

Tom Herrera from the recruiting office and the emcee of the event, set the tone early making the audience feel comfortable using satire in his introduction and throughout the event. Jesse Gallegos, public information coordinator, was the first speaker and he asked the employees to come together and stop favoring certain groups. He also talked about the importance of having employees and students get involved in the college’s newsletter *The Luna Light* and its two radio shows *The Luna Community College Half Hour Radio Show* which airs at 1 p.m. every Thursday on KNMX and *The Community Education Show with Dr. Pete Campos* which airs every other Monday at 8:30 a.m. on KFUN.

Dr. Campos spoke twice during orientation emphasizing the importance of showing heart and vision for one another and especially for the students that are served. At one point, Campos said we need each other to continue to grow so our students continue to grow.

The second time Campos spoke he dressed like President Teddy Roosevelt and stressed that Luna Community College was a shining light in northern New Mexico. He also said that Luna

Luna Community College computer science faculty member Jeff Thomson gives last week’s employee orientation a thumbs up.

Luna CC Tech Prep summer students say program was great

The following comments were made by this summer’s Luna Community College Tech Prep students. The LCC Tech Prep Summer Program is designed to introduce students to college, strengthen math, science and technology skills, enhance career development and give students the opportunity to earn college credit. College credits can be applied toward an associate degree at Luna Community College and are also transferable to four-year colleges or universities.

- “Tech Prep was an amazing opportunity for me as well as the numerous other students who participated. This 2009 summer was exceptional. The Tech Prep Program provided me with many needed resources, as well as broaden my horizons in terms of what I can do with my education. The trips that we took to Sandia National Laboratories and Intel supplied invaluable exposure to many extraordinary career options available to me. The knowledge obtained from this outstanding program opened my eyes to the various roads that I can choose from.”

Continued on Page 5

Elaine Montaña, who has been at LCC since 1989, says her colleagues are like family to her

Name: Elaine Montaña

Position: Office Manager

How many years at LCC (what year did you start)? Twenty years have been recognized by the Board; however, I began my tenure in 1984 as a part-time employee/student. I was hired fulltime in 1989.

Favorite food and why? Chili, it flavors unlike any spice. I also like to try different foods and restaurants.

Favorite hobby and why? Music, exercise, it relaxes and energizes me.

Favorite TV show and why? Do not have particular show.

Where would you like to see yourself five years from now? I'll have several options upon retirement, like traveling, continue with my education or work again!!

What do you like best about LCC? Luna Community College is a prestige college; I been fortunate to gain knowledge throughout various disciplines. My colleagues are like family—close. Prior to coming to LCC, I worked very hard while self-employed. That experience in itself has taught me a valuable lesson—I have come to appreciate working at Luna Community College and my education.

What do you like least about LCC and what would you offer as a solution? I like to practice the affirmations taught by Pacific Institution. Being positive is very important to me. I make every effort to practice it daily as a means of encouragement to myself and others.

What is your greatest strength? I have in-depth knowledge in the LCC Department of Nursing, pertinent skills important to my job

Elaine Montaña says that five years from now she will either be retired, do some traveling, pursue more education or work again. She is a team player.

and the people around me. In groups, I consider myself an effective team player, whatever the role. I am dedicated to community organizations such as the Red Cross, a board member (for over 16 years) of the Sangre de Cristo Association, and am employed part-time with Victory Home Health as a Personal Care Aid

and through this experience, have acquired Certification as a Nursing Assistant.

Anyone wishing to nominate an LCC employee to be featured in this section should call Jesse Gallegos at 454-2510 or e-mail him at jgallegos@luna.edu.

Recruiting activities

Monday, Aug. 17 – Fall Semester begins; Guided Tours LCC Campus

Tuesday, Aug. 18- w/Student Activities-Meet the Rough Riders Baseball & Softball Players, Student Services, Display, 12noon-1pm. Hot Dogs & drinks.

Wednesday, Aug. 19- ACE Tutoring Center Grand Opening, Taco Bar, 11 a.m.-1 p.m., unveiling @ noon; Dual Credit registration @ Cuba HS-Moses

Thursday, Aug. 20 – w/ Student Activities-Back-to-School BBQ, Rough Rider Grill Patio-11:30-1p.m.; KNMX Radio, LCC Half-hour Show. Call Jesse @ extension 1200 if you wish to be a guest.

Friday, Aug. 21 – KFUN Radio, LCC Community Ed., et.al.

Saturday, Aug. 22 – LCC Foundation Golf Tournament, 9am, Penderies Golf Course.

Attention

All Staff & Faculty!

Would you like the opportunity to visit with President Campos to share your thoughts, concerns, and ideas?

Join us for
"A Chat with The President"
Tuesday, August 18, 2009 from
9:00 AM - 11:00 AM
at the Luna Community College
Rough Rider Grill

Dr. Campos is inviting all employees to stop by for a short one on one discussion to hear your thoughts, comments and suggestions.

Employee orientation...

Continued from page 1

Community College is on the rise.

"There is a purpose of why we're here," said Campos.

Campos also said that the college is currently seeking over \$30 million in stimulus resources. He did admit that the state is going through some tough financial times, but he said through hard work and creativity LCC will get through it.

"We serve a poor area and we will continue to reach out to small areas in our community,"

said Campos.

All the academic directors also spoke during orientation talking about the success they had and about the future outlook. KOAT anchor Melissa Montoya also spoke talking about the influence that education had in her life.

In one segment of orientation, LCC employees were split in two groups with Michael Montoya and Harry Anderson leading, and were asked to come out with what they felt were important aspects of the college. Some of the responses were teamwork, structure, com-

munication, integrity, respect, feedback, relevant programs, preparedness, morale and making a difference—one student at a time.

"I've been here over 20 years and this was the best orientation I've ever been to," said one employee.

Another employee said: "The speech that Dr. Campos gave was absolutely amazing. I was astounded."

One employee said: "I wish we would have heard more financials and human resource developments."

Public health experts concerned about flu season

With flu outbreaks continuing this summer in the United States, public health experts are concerned that the fall flu season could be a severe one. While medical professionals consider issues of health care, what should student affairs, communications and academic professionals be doing to plan for possible outbreaks?

On August 20 at 1 p.m. Eastern, [Inside Higher Ed](#) will present "The Threat of H1N1 Outbreaks: What Your Campus Needs to Know" - an audio conference featuring Anita Barkin, the director of student health services at Carnegie Mellon University and chair of the American College Health Association Coalition for Emerging Public Health Risks and Emergency Response Planning. Ms. Barkin will provide an overview of the H1N1 virus (designed to be understandable to those who aren't health professionals), cover the key planning that should be taking place now in units beyond health centers, discuss how to determine whether to temporarily suspend classes and activities and/or evacuate residence halls, and much more.

The program is ideal for student affairs officers, residence life administrators, academic affairs staff, department chairs and deans, public relations officials and senior administrators, and will feature a 30-

minute presentation followed by a 30-minute question-and-answer period. The entire program will last one hour.

"The Threat of H1N1 Outbreaks: What Your Campus Needs to Know" audio conference costs \$199 for a single phone line. Listen yourself or with a group around a conference table.

For more information contact Lori Holtz at 202-659-9208, x 116 or lori.holtz@insidehighered.com

I hope you'll participate in this important discussion.

Thanks,

Kathlene Collins

Information provided by Laura J. Mulry, Director of Communications, New Mexico Higher Education Department.

Between 60 to 65 players are expected to be on campus this fall semester. Here they listen to instruction before practice.

Luna CC Tech Prep...

Continued from page 1

- “This program was fun and challenging. My favorite part was going on the field trips to Sandia and Intel. I learned a lot. It was an experience I won’t forget. This program helped me a lot and I feel I will do better in my high school classes because of how challenging it was. Thanks for everything and I’ll be back next year.”
- “I enjoyed my second summer with the Tech Prep Program. The trip to Intel showed me some options that are available to me in the math and engineering field. I have enjoyed taking classes here because I know that they will benefit me later on. This program has showed me many of the options of careers dealing with math and engineering and it has interested me enough that I might want to pursue a career in this area.”
- “I think the Tech Prep Program is a great program for students to get a start on college and to meet people. The program was a good experience and should continue.”
- “I feel that the Tech Prep Program was a program that allowed me to experience a college environment and to start getting credit early for college. With this program my summer wasn’t just fun but it was fun and I got credit for it. The classes offered are of great variety and I feel that this program should continue so students can get experience at college. When they do go, they’ll be ahead and more comfortable in the college environment.”
- “The Tech Prep Summer Program was a great experience. It helped me get a head start in college and in my future. I look forward to doing this program again next summer. I really enjoyed doing Tech Prep.”
- “I enjoyed my first year in the Tech Prep Summer Program. It gave me something to do during the summer and it helped me get ahead in college courses. I would love to be in the Tech Prep Summer Program one more year after I graduate. I hope to see this program continue and help other students enter this program.”
- “Tech Prep was a good experience, and I learned a lot and I wish I could have been in it another year. Everybody was nice and helpful and I made more new friends.”
- It is a good experience for students to get ahead. The staff is friendly and helpful. I learned a lot in this program and I wish I could have been in it another year.”
- “The program was fun and I especially liked the field trips and meetings because they helped me learn about new horizons, jobs and information on certain things.”
- “I really enjoyed the program and thankful for being able to participate in the annual Tech Prep Program. I was able to take classes tuition free, and I was really lucky to be granted that. To me the Tech Prep Program is a great way to experience technology and summer fun at its finest.”
- “This was a very good program. Considering all the classes and books were free, this was an excellent opportunity for all to participate in. Plus the stipend was good as well. The breakfast, however, was real poor. We usually only had a granola bar, graham crackers. We would occasionally have fruit and this was never satisfying. The lunches were OK. Trips were good and well organized.”
- “I really benefited from attending Tech Prep this summer. Surprisingly, I enjoyed Freshman Comp. II. The food was pretty good. I ended up eating seconds. I also liked this year’s shirt. It was very unique. I would recommend this program to all my friends.”
- “This program is very proficient. I enjoyed the learning experience. I encourage others to join this program because it sure does help and make a difference.”
- “I enjoyed the Tech Prep Summer Program. I think it was very beneficial. I liked the classes and the trips. I had a lot of fun this summer and intend on coming back next year.”
- “Tech Prep is a good program. It really helps to prepare you for college and get ahead with your core.”
- “I believe the Tech Prep Program has

helped exceed and accelerate my learning ability to further go a career in engineering, math, or science. Last summer, I was given the chance to take physics and college. Since I love math, this program has helped me to take these courses. This summer, even though I only took one class, I enjoyed taking statistics. I wish the semester was longer because this course really interested me. I also like this program because it works around my schedule. Having been in Girls' State and choir camp really was a toll on my schedule. But the program still worked around my schedule and was able to take at least one class. Thank you!! The field trips last year were awesome. I had fun and had a great learning experience.”

• “The Tech Prep was a great program. It does help you to finish some of your classes. It’s a great head start.”

• “I think the Tech Prep Program is a great program for students to get a start on college and to meet people. The program was a good experience and should continue.”

• “I really enjoyed this Program. It was nice being in it and I liked the field trips.”

• “This program is a good thing. It basically encourages you to go to school and shows the different careers you can get into while going to school. It helps the students.”

Quote of the Week

“The strength of the United States is not the gold at Fort Knox or the weapons of mass destruction that we have, but the sum total of the education and the character of our people”—*Claiborne Pell (1918-), American Politician.*

Students!

Are you looking for on-the-job training? Are you seeking skills for a new career? Do you want to gain experience in your field of study? Do you want to gain college credit? If you answer yes to any of these questions, the LCC Small Business Internship Program can help.

LCC – Connecting Students to the Workforce!

Luna Community College will “launch” a pilot program this fall called the Small Business Internship Program. The purpose of the program is to provide LCC students opportunities in workforce experience by applying educational skills and knowledge to meet the needs of the statewide workforce community.

Program Goals:

- Provide students access to business experience that could lead to gainful employment
- Involve students in community projects, collaborations, and partnerships
- Provide students an opportunity for a stipend salary contingent on available funding

Program Benefits:

- Classroom instruction is integrated with practical on-the-job experience
- Create future employment opportunities
- Students can make career decisions based on practical work experience.

If you want to participate in the Small Business Internship Program please contact Don Bustos at 505-454-2595 or dbustos@luna.edu for further information.

LCC Foundation Golf Tourney set for Aug. 22

The 2009 Luna Community College Foundation Annual Golf Tournament will be held on Saturday, Aug. 22 at the Pendaries Golf Course in Rociada. A shotgun start is scheduled at 9 a.m.

A four-person team sponsor is \$1,000 or \$250 per individual. A hole sponsorship is \$250.

The entry fee covers green fees, a cart, and a prime rib dinner. All money raised will be used for scholarships.

For more information, call Tournament Co-Director Ernesto Salazar at 505-425-7584 or Theresa S. Vigil at 505-454-5367.

LCC Foundation Scholarship Fundraiser

Friday, August 28, 2009

Mindsets are changing

By Dr. Pete Campos

The trees have been shaken across the country; master and strategic plans have been removed from shelves, dusted off and activated; and, many of the ways we have traditionally conducted personal and public business are *no longer relevant*.

Today, there are more **homeless children**, the *simple expectations of students* that we help them become proficient in core life skills have skyrocketed and more is expected of us to provide health care, education and employment opportunities so young adults will evolve and transition well throughout their chosen careers and life.

Now, flexible class schedules including evening hours and weekends are needed, many high school students have completed their core requirements by the 11th grade and are poised to take advantage of their senior year. When they graduate, we must unselfishly guide them through the uncertainties of transitioning into the post-secondary educational system. Today's students will enter adulthood (they have no choice) and whether they are prepared or not must be ready to manage the responsibilities and essentials of life.

We may say, well, it's not our job or we are doing all that we can do. *This no-fault attitude doesn't work!* Using a technological term, it is now time to **refresh our approach** and focus on student success!

We are poised to take what works, hone this core of essentials and provide threshold access to students seeking to achieve beyond the status-quo at Luna Community College.

We provide extra-ordinary access to our dual credit and concurrent enrollment programs; many of our established programs have been updated to meet today's and future employment demands; a career oriented academy for junior and senior high school students is evolving; and, we as "**La Familia Luna**" are working as one. ***We will not fail!***

Whether it is on-line education or hands-on vocational training, our focus is to have students keenly educated and trained by highly qualified and certified instructors.

Our message delivered is significant, our pure commitment to students should be second-to-none and as we move toward to address today's reality, we must ratchet-up our student centered initiatives their effective delivery.

It's time to step-up faculty and staff professional development, provide non-personal constructive criticism and pursue complete understanding of macro and micro student data and prepare students who choose to learn from us so they will be well-prepared to go to the next level (advanced post-secondary education, employment or military service) when they successfully complete their course of study at Luna Community College.

We are focused on student success and although there are many hurdles to overcome, the Luna Community College family will remain on task to successfully deliver what students need to

Patricia Kuhlman (top), Furniture and Cabinet Making Instructor at the LCC Springer Satellite) and Sherry Goodyear, humanities instructor at the LCC Springer Satellite. Dr. Pete Campos (right), dressed as President Teddy Roosevelt is pictured here with Action 7 News anchor Mellissa Montoya.

What are the sports options at LCC?

By Richard Tripp

Much talk and discussion has been given as to which sport should Luna Community College start up next. Well, let's examine the options.

From what I gather, many feel basketball should be the next sport at LCC. Well, first question will be to research how much it will cost to have a team. Anybody know? We are talking uniforms, practice attire, transportation costs, and not to mention the salary to pay the head coach. Wait, where is the Rough Rider hoops team going to perform? Where shall the coach recruit his or her players? What type of players is best fit the system? Where are they going to live? Should the school start a men's team first, or a women's team or both?

What about a tennis team? Think about it. It is not that expensive to run and there are courts available to play on. Not to mention, building a tennis facility is way less expensive than building an arena. Like basketball, tennis has a rich tradition here in the Meadow City. In fact, I say name it the Dave Wesner Tennis Facility. After the great Optic Sports Editor Dave 'The Wild-Wild Wes' Wesner, a great tennis fan.

A tennis program is considered to be a "Prep Sport" which will add credibility to an already great school.

What about a soccer program. Futbol was considered to be the fastest growing sport in the USA. In 2001 it is estimated that 13.7 million people participated in soccer. Far contrast from the 26 million in basketball. But the advantage is there are fields available to play on and practice. Still the ques-

tions, like that in basketball arise.

Hey, I know. What about starting track and field team? Low cost to operate and travel is limited to one day a week, so missing classes will not be that big of a deal.

Wait a minute. We have not touched on the academics side, have we? The missing classes and things of this nature might raise a few eyebrows. Ok, maybe later.

Football? Too expensive. Next case.

What about golf? We are blessed to have two great looking courses in our backyard at Highlands University and Pendaries Golf Course, so really would not be too expensive to operate and again, a prep sport of sorts. Millions of people world-wide have made the game of golf the number one recreational sport.

The powers that be have a lot on their plates in trying to decide what sport to start and if they will start another sport.

It is obvious it will raise enrollment, but what are the positives and negatives? How much money will it cost? Will it generate money? Does the school put its money into athletics, or does it put it into adding educational programs?

Richard Tripp is an adjunct teacher at LCC in the Humanities Department. He is also a freelance writer as well as a radio sportscaster for KNMX Radio. He has is a 24-year educator for the West Las Vegas School District..

This picture was taken right after a rainfall near the Luna Community College campus recently. These particular rocks and trees can be seen near the north entrance.

KQBL, 92.7 The Bull playing country music

Today's stars of country music, including George Strait, Alan Jackson, Toby Keith and Kenny Chesney, along with the Legends of Country, such as Merle Haggard, George Jones, Reba, Dolly, Willie Nelson, Hank Williams, Jr. and more, can now be heard 24 hours a day, seven days a week in Las Vegas and across Northeastern New Mexico on **KQBL, 92-7 The Bull**.

Matt and Martha Martinez, of KNMX (540 AM) and KMDZ (96.7 SAM FM), proudly announce the launching of *Today's Stars and Legends - Real Country - 92-7 The Bull* on the FM powerhouse KQBL. The station will broadcast to Las Vegas and across northeastern New Mexico, playing great country music and providing local and state news from their news center.

The 25,000 watt FM radio station reaches a wide region of listeners who live in northeastern New Mexico, southeastern Colorado, western Kansas and the Panhandle of Texas and Oklahoma. **92-7 The Bull** joins 540 KNMX as the area's only regional stations. "No one can cover the area like our stations can," states Matt Martinez. "This provides so much more for our clients and really stretches their advertising investment."

"T-Bone" Taylor Read hosts the **Morning Bull** 7-10 AM weekdays. Read is a Las Vegas native with a broadcasting degree, but he's

also a local rancher. "He's a real cowboy" says Martinez.

The Bull will also be the permanent home for the University of New Mexico Lobos football along with men and women's basketball. This gives the owners coverage of all local teams on its family of stations. KNMX is the home of West Las Vegas Dons and KDMZ is currently the home of Robertson Cardinals and New Mexico Highlands' sports, as well as the annual north/south basketball and football games. According to Martinez, "This makes us a true Sports Authority."

92-7 The Bull will focus on the community with news, weather and local issues. But the mornings will concentrate on giving the listeners lots of great country music without a lot of talk. The station will also feature great contesting and special features, including **CT 40 with Bob Kingsley**, a popular national weekly countdown show of country music's Top 40 hits.

The Martinez family has been in the radio business since 1996 when it purchased KNMX. In 2002 they added KMDZ. The addition of KQBL gives the area a wide variety of talk, sports and music for Las Vegas and northeastern New Mexico. For more information contact Matt Martinez of Sangre de Cristo Broadcasting, Inc. at (505-425-5669) or 304 South Grand Ave, Las Vegas, NM 87701.

Luna Community College students Rudy Tafoya and Teya Moore walk to register for class. Registration runs through Monday, Aug. 24.
