**Luna Community College Media Arts and Film Technology Instructor Kenneth Bachicha works with student Lorenza Marcais on Thursday in a newly opened classroom at the Multipurpose Educational Center. Other students in the front row are Myrtelina Tirado and Janea Varela. These students, taking introduction to photography, are using IMAC Apple Computers. For more on this program, please call 505/454-2565.**

## LCC Wellness Center to start basketball intramural program

Basketball is coming to Luna Community College in the form of intramurals.

The Luna Community College Wellness Center staff will be starting a basketball intramural program for both LCC students and community members. The goal is to hold 3 on 3 competition three days out of the week. There will be maximum of five players per team and will follow NFHS basketball rules. There will be a charge of \$50 per team. The money collected will be placed in the Wellness Center account. Money in this account will be used for prizes, awards and equipment. In addition, a running track of extracurricular activity money at the Wellness Center will be kept.

The winning and second-place teams will be awarded t-shirts. Competition will begin on Monday, March 18 and run through Thursday, May 9. It will culminate with a tournament.

The LCC Basketball Intramural Program is open to both female and male participants who are 16 and older.

“I want to involve the wellness center in more student activities and would like to see more community members utilize our facilities with fun and competition through basketball,” said LCC Wellness Center Director Dawnette Garcia-Najar.

For more information, call Garcia at 505/425-8767.
