Distance Learning Office

E-Learning System Used by Luna Community College

The E-Learning system used by Luna is Blackboard Learn, and the classroom interface is Blackboard Collaborate. These two components together are Luna's online system where all online classes take place. It is up to your instructor to inform you about how these two components will be used in his or her specific class as every class is different. Blackboard Learn consists of all the information about your class including the syllabus, homepage, assignments, discussions, assessments and so on. A Blackboard Collaborate link is built-in to your Blackboard Learn class and is accessible via the "Online Classroom" link on the homepage of your class. Collaborate is where live class sessions are held. Please see other FAQ's for more information on accessing and using these two very important online tools.

"Creating Opportunities for You!"
