

LCC'S **TECHNOLOGY ACADEMY** classes start on Monday June 6. Entering high school juniors and seniors and all other students interested in obtaining a STEM certificate are encouraged to register for summer 2016 semester classes. As part of the STEM **TECHNOLOGY ACADEMY**, students will be traveling to see STEM jobs in action. Field experiences to Los Alamos National Laboratory and the New Mexico Museum of Natural History are planned for the summer session as well as other STEM related activities. Students interested in starting do not have to take the Compass placement entrance exam to start, but must take them prior to starting any math or English classes. Students registering for STEM 105, Computers for Scientific Research and Geology 101, Survey of Earth Science will automatically be enrolled in the **TECHNOLOGY ACEDEMY**.

Entering high school freshmen and sophomores can enroll for a community education class in Introduction to Computer Aided Drafting for a beginning college experience and be part of the **TECHNOLOGY ACADEMY**. For information students can call 454454-5370 for more information about how to register for classes.
