APRIL 2014

"Creating a Pathway to Success in High-Demand Programs"

Spring has Sprung!

Larry Paiz and Susan Olson attended the Laerdal SUN (Simulation Users Network) Conference on April 1-3 at the San Diego Hilton on Mission Bay. A very realistic simulation of an emergency involving a pregnant female during an overseas deployment by U.S. Navy medical personnel was performed on opening day. Throughout the three day conference, over 20 industry leading experts presented on best practices, tips, tricks and innovations that have brought success to their simulation training programs.

G.O.Bond and Title V collaboration continues to make progress toward the Auto Collision project. Construction is scheduled to break ground this August.

Year 2 second quarter IET meeting took place April 8, 2014. Progress and information on future projects were presented to the advisory committee along with Susan Olson's and Larry Paiz's SUN conference experience.
