## Collision Repair Building Project Timeline

October, 2013 – September 2015

Title V funding each year is contingent on yearly project progress

Pictured is: Wilson & Company Project Manager John Montoya who is scheduled to present the Auto Collision construction plans at the next Title V IET Meeting scheduled for July 15, 2014.

## Wilson & Company Title V Presentation

On June 11, 2014, Wilson & Company Project manager John Montoya, architect Larry McDonald and Daniel Andrews gave a detailed project overview to the Title V staff, LCC President Dr. Campos, Ron Gonzales, Gary Martinez, Leon Roybal, Matthew Cordova and Miguel Martinez. All plans, blueprints, and timelines were disseminated to everyone as to the start up of the construction process. Much discussion and many questions on the scope of work were asked by everyone as to specifics of designated areas for auto collision equipment, tools, walls, electrical systems, mechanical, and security systems.

Wilson & Company will give Luna Community College, specifically, Title V the go ahead when construction will start, contingent on contracting out services. We are hopeful this will start at the beginning of July and projected to start soon after that.
