Attention freshmen students: Read this to help you succeed at the college level

First and foremost, we want to see everyone succeed in college. But we all know it’s not as easy as it sounds. But here are some tips on how each of you can accomplish your goals.

The following are tips taken from Linda O’Brien’s article on *How to Get Good Grades in College*. The book was published by Woodburn Press.

Here are the 10 steps on how to get good grades in college.

Step one. Attend every class. If you want to get good grades in college, you must attend every class—not almost every class.

Step two. Be organized. The student must determine what is best for them.

Step three. Manage your time well. With good time management, you have more free time, less stress, and a feeling that you’re in control.

Step four. Be successful in class. You will enjoy college more and you’ll get higher grades if you: do every assignment; learn how to adapt to different instructors; sit in the front of the class whenever possible; be a good group member; be on time to each class; participate in class and commu-

nicate with your instructors.

Step five. Take good notes. Tests usually cover material that the instructor has presented in class. It is, therefore, important to have good classroom notes from which to study.

Step six. Know how to read a textbook. When you know how to read a textbook, you are able to comprehend and remember what you read.

Step seven. Study smart. Students who study smart find that they spend less time studying, and yet they get better grades.

Step eight. Know how to take tests. In order to do well on any test or exam, you must study hard and be prepared.

Step nine. Reduce test anxiety. While a little anxiety before a test improves concentration, excessive worry, or test anxiety, can lower one’s test scores.

Step 10. Use available services. Colleges provide a wide variety of services in order to help students get the most of their college experiences.

For more detailed information on this, see www.woodburnpress.com.

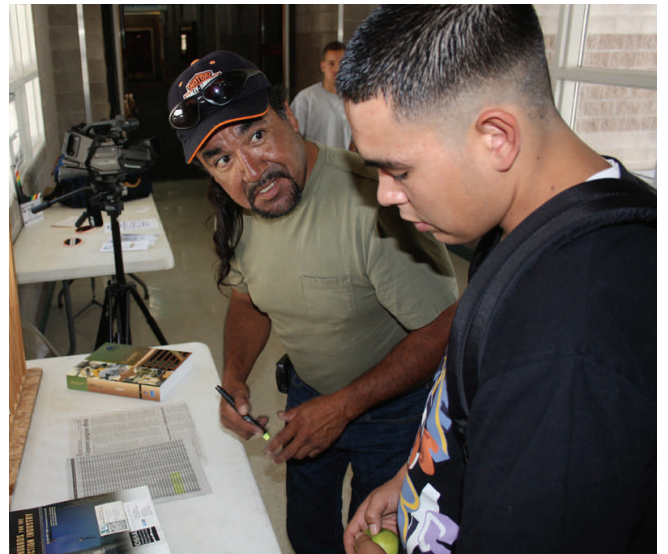

Good luck and may your dreams come true.

Luna Community College freshmen students Amber Harding, Laura Sandoval and Evangeline Samora attended orientation at the school on Friday. Harding is from Arlington High in California, Sandoval is from Del Norte High and Samora is from Manzano High. For more on the LCC Freshmen Orientation, see page 2.

Individual attention

By Dr. Pete Campos

Luna Community College is a treasure chest ready to be discovered. Once you've found us – please look at the many valuable services we can provide. Here is an example: A quality curriculum with guidance and tutorial services that keep you motivated to meet your educational objectives; once you have earned a certificate or degree you will be prepared to move on to your next goal.

To help you succeed, we need your input! Please, tell us about the obstacles that stand in your way while attempting to complete your program of study. Is it a learning disability, lack of housing or you're not fully grasping the coursework being taught? Regardless, it's a two-way street. For us to help, because we are not mind readers, we need to hear from you. Our goal is to further reinforce and build upon your educational base so you can move forward, learn more, earn more income and eliminate many of the stresses caused by poverty and lack of education.

Take your time here at LCC seriously. Whether you are a high school student taking

LCC Cosmetology graduate Denise Baca gives Dr. Campos a haircut last semester. Cosmetology is one of many areas of study where students receive practical experience in their chosen field.

dual credit courses, a first-time college student, a non-traditional adult learner or a person completing your college degree – give your best and expect the same from us. We want you to have a life filled with many accomplishments.

The following hints should help: 1] Care

for your mind and body – You can't perform at an optimum level when you don't take care of yourself; 2] Seek out an advisor – build a positive bridge with a Luna family member who will provide you with constructive advice, encouragement and guide you during tough times; and, 3] Take the time and energy to plan your future while here at LCC. If you take care of yourself, pay attention to your career plans and apply yourself in class – you'll be prepared to move on and be successful at many things such as securing and holding on to a good paying job and enjoying the little things that lead to a satisfying life.

Yes, it will take personal sacrifice, wholehearted commitment, intense studying, giving up some fun times and possibly redirecting your energy. It is important to pay attention to these things, because your time with

us will pass quickly. How many times have you asked yourself, where has time gone? So, at least two full-fledged years to attain a degree or the time it takes to earn a certificate will be well worth it! *Best wishes for a meaningful 2010-2011 school year.*

Does 2 plus 2 always equal 4? It can, if NMHU and LCC begin working together

By Jesse Gallegos
*A Different
Perspective*

NMHU professor Dr. Eric Romero shares his views with members of the New Mexico Higher Education Department at Kennedy Hall.

This past Wednesday while I was at Highlands University taking pictures at a town hall meeting with the New Mexico Department of Higher Education, I saw my old buddy, longtime HU Recruiting Director Gil Gonzales. He stopped and asked me if I could set up a meeting with he and some of our officials here at Luna Community College about a 2 plus 2 initiative.

Essentially, a 2 plus 2 collaboration would be Luna Community College working on articulation agreements with four-year universities (in this case with Highlands University) which will honor LCC's core general education courses, certificates and conferred degrees so, when sophomore students consider transferring to a university for their junior and senior years they will be well-prepared to do so.

I think that is a great idea in many fronts which I will go into detail later in this column.

We all see what is happening with education today. Everyone is concerned about it. Whether it be the media, parents, board members or even our two gubernatorial candidates Diane Denish and Susana Martinez. Although everyone has their own opinions on this, the bottom line is that we're losing too many of our students. We all agree on one thing: Students are not succeeding at the rate we would want them to.

Am I an expert in this subject? In a simple answer, no. But I really think that our two local colleges really need to look into it. And not just President Campos and President Fries either. I believe for this to work, both our presidents need to get their soldiers involved. Keep in mind that this is a situation that is occurring all over the country. It's happening in New York City, Richmond, Va., Salt Lake City, Utah and Riverside, Calif. We can't take care of this all over the nation, but we surely can take a closer look at it in our neck of the woods.

Highlands and other four-year colleges should provide Luna Community College input in order for us to provide the best remedial courses possible to prepare students to be proficient at the university level. In turn, once students are at the four-year institution, instruction can be taught and understood with proficiency.

I encourage everyone to look at the following and take some action with it. I know I will be getting calls from my own people here at Luna Community College, Highlands and perhaps even the New Mexico Department of Higher Education. And that's okay.

- A 2 + 2 Program better prepares students for their chosen program of study. For example: when a student takes the compass test (a test that quickly evaluates incoming students' skill levels in reading, writing skills, writing essay, math, and ESL) once the results are known, the student can be placed in appropriate classes for a starting place from which to begin proper instruction. The key, once a student successfully completes a program of study at LCC he/she can move into a focused program of study at New Mexico Highlands University without having to take additional remedial courses.
- 2 + 2 Program: connects students to the resources they need to achieve academic success.
- LCC has structured its academic programs to provide remedial and dual credit – AP courses to prepare high school juniors and seniors to then enter the post secondary education level prepared either to earn an associate's degree or possibly begin as a junior at a four-year university.
- Why have we prepared to do this over the past two years at Luna Community College? Because of the need to guide students through assessment, tutorial services and appropriate education and give them the skills and tools to study, know where and how to gather academic and real life knowledge and to be prepared to enter the next level of their lives whether it be to choose the military, work force or a university setting.
- Recently, results were released for 12,679 New Mexico students who took the ACT (American College Testing) - which is a standardized test for high school achievement and college admission in the United States produced by ACT, Inc. – this year in preparation for possible college attendance. In general, the results indicated our high school graduates are ill-prepared for entry-level college classes. A total of 59 percent met the ACT readiness benchmark for English composition; 47 percent met the benchmark for social science; 32 percent met the benchmark for algebra; and, 22 percent met the benchmark for biology.
- We can no longer afford to send a large number of students to college who are not equipped to succeed.
- So, LCC is making every effort to individualize academic programs for students so they will be prepared to attend NMHU their junior year in college. As a learning community, we have the educational institutions to master the concept and strategy that will lead to student success.
- We owe it to all of our students, the majority largely Hispanic population for their sake, the sake of our service area and the health, education and economic future of our state's population.
