

Academic Map: Allied Health with Prep

Associates of Applied Science (AAS) | minimum of 60 Credit Hrs | Catalog Year 2022 - 2023

DESCRIPTION: The Allied Health program establishes an excellent foundation for many allied health careers and educational programs. The purpose of this degree is to get students ready to either transfer into an allied health career program or to a pre-professional program at a four-year college. The degree is highly flexible and offers “focused” pathways to accommodate various pre-requisite requirements for the many health-related programs students may enter. Possible professions include but are not limited to: laboratory scientist, occupational therapy, pharmacy, physical therapy, physician assistant and nursing (BSN). **NOTE: AAS is not needed for students entering nursing; completion of degree may limit financial aid opportunities**
