# FREE COVID-19 TESTING

- Free self-collected saliva test

- Drive-through for safety and convenience (remain in your vehicle)

- Simple, quick, painless

Fast, Simple, Painless Testing

1 Open the swab package and remove the swab.

2 To keep the volunteers safe, please cough into your sleeve.
Cough deeply 3-5 times and swish spit around your mouth. Swab inside each cheek, upper and lower gums, underneath and top of tongue, and roof of mouth.

3 Uncap the lid of the tube and insert the swab, tip pointing down.

4 Securely cap the tube and turn it upside down several times to mix specimen with tube solution.

5 Place the tube in the biohazard bag and seal the top.

6 Return the bag to the Curative worker.

FDA-Authorized | Pain-Free Swabbing | 20 Seconds To Perform | 90% Clinical Sensitivity | 100% Test Specificity

Luna Community College Main Campus

Designated Tobacco Use Areas

Testing site
